## **DETAILED ACTION**

 Claims 11-20 are currently pending. Please take notice of the election to species requirement in paragraph 2. To be fully responsive, applicant must fulfill this requirement.

## Election/Restrictions

2. This application contains claims directed to more than one species of the generic invention. These species are deemed to lack unity of invention because they are not so linked as to form a single general inventive concept under PCT Rule 13.1.

The composition of Asiasari Radix extract is involved in enhance memory (see Abstract, Han et al., 2003, Brain Research, 974, 193-201). The claims are not involved in hair loss or growth; therefore, the reference shows that the claimed composition has a different use then the uses claimed. The reference establishes that the extract is known, thus the claims lack unity of invention.

The species are as follows:

Applicant must elect a specific extractant for Claims 13, 14.

Applicant must elect a specific inhibitor of 5 alpha-reductase activity for Claim 16.

Applicant must elect a specific activator of hair follicle cells for Claim 16.

Applicant must elect a further comprising ingredient for Claims 18, 19.

Application/Control Number: 10/592,946

Art Unit: 1655

Applicant must enumerate all of the components to be in the elected

composition.

Applicant is required, in reply to this action, to elect a single species to which the

Page 3

claims shall be restricted if no generic claim is finally held to be allowable. The reply

must also identify the claims readable on the elected species, including any claims

subsequently added. An argument that a claim is allowable or that all claims are

generic is considered non-responsive unless accompanied by an election.

Upon the allowance of a generic claim, applicant will be entitled to consideration

of claims to additional species which are written in dependent form or otherwise include

all the limitations of an allowed generic claim as provided by 37 CFR 1.141. If claims

are added after the election, applicant must indicate which are readable upon the

elected species. MPEP § 809.02(a).

The claims are deemed to correspond to the species listed above in the following

manner:

None.

The following claim(s) are generic: 1.

The species listed above do not relate to a single general inventive concept under PCT

Rule 13.1 because, under PCT Rule 13.2, the species lack the same or corresponding

special technical features for the following reasons:

Claim 16 requires an election of species for the different species of plant material. It lacks special technical feature because the plants are from different genus. Applicant must elect a plant material for Claim 16.

Claims 13 and 14 require an election of species for the different species of extractant. It lacks special technical feature because the extractants are from different chemical structures. Applicant must elect an extractant for Claims 13 and 14.

Claims 18 and 19 requires an election of species for the different species of chemicals. It lacks special technical feature because the chemicals are from different sources and have different chemical structures. Applicant must elect a chemical for Claims 18 and 19.

Applicant is advised that the reply to this requirement to be complete must include (i) an election of a species or invention to be examined even though the requirement may be traversed (37 CFR 1.143) and (ii) identification of the claims encompassing the elected invention.

The election of an invention or species may be made with or without traverse. To preserve a right to petition, the election must be made with traverse. If the reply does not distinctly and specifically point out supposed errors in the restriction requirement, the election shall be treated as an election without traverse.

Applicant is reminded that upon the cancellation of claims to a non-elected invention, the inventorship must be amended in compliance with 37 CFR 1.48(b) if one

Art Unit: 1655

or more of the currently named inventors is no longer an inventor of at least one claim remaining in the application. Any amendment of inventorship must be accompanied by a request under 37 CFR 1.48(b) and by the fee required under 37 CFR 1.17(i).

Any inquiry concerning this communication or earlier communications from the examiner should be directed to CATHERYNE CHEN whose telephone number is (571)272-9947. The examiner can normally be reached on Monday to Friday, 9-5 PM.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Terry McKelvey can be reached on 571-272-0775. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.

Information regarding the status of an application may be obtained from the Patent Application Information Retrieval (PAIR) system. Status information for published applications may be obtained from either Private PAIR or Public PAIR. Status information for unpublished applications is available through Private PAIR only. For more information about the PAIR system, see http://pair-direct.uspto.gov. Should you have questions on access to the Private PAIR system, contact the Electronic Business Center (EBC) at 866-217-9197 (toll-free). If you would like assistance from a USPTO Customer Service Representative or access to the automated information system, call 800-786-9199 (IN USA OR CANADA) or 571-272-1000.
